## 12V150w inverter input current

What is a 12V DC 150W inverter?

The OSRAM POWERinvert Modified Sine Wave Inverter 12V DC 150W is a compact solution for converting 12V DC power to 230V AC, delivering mains power directly from your car. Perfect for business trips, road trips, and holidays, this inverter supports devices up to 150W, such as digital cameras and laptops.

What is a 12V 150W pure sine wave inverter?

A 12V 150W pure sine wave inverter is a device that converts 12 volt DC from a battery (like in cars or solar setups) to 120 volt AC with a maximum power output of 150 watts. Pure sine wave power inverters are ideal for sensitive electronics, as they provide clean, stable power without causing interference or potential damage.

What is a 150 watt power inverter?

A 150 watt power inverter is a device that converts DC (direct current) electricity to AC (alternating current) power, enabling you to power larger devices. For most appliances and gadgets to function properly, they require either pure sine or modified wave AC power.

How much power does a 12 volt inverter use?

This high efficiency DC-AC inverter converts 12 Volts DC to 150 watts of pure sine-wave AC power at 230 Volts, 50 / 60 Hz (Switch selectable: 50 Hz default). The unit comes with a 12V plug. Features include overload protection, low battery alarm / shut down, low idle power draw. AC power is available from a Schuko receptacle.
