## 18v solar Panel

What is the difference between 18v and 12V solar panels?

Batteries are nearly always rated at 12V. 18V solar panels are often used with 12V batteries to ensure the current always flows from the higher potential (solar panel) to the lower (battery) and not the other way. However, panels compatible with 12V batteries are often referred to as 12V solar panels.

Which solar panel is most efficient?

21% efficiency. WSL Solar's 30W solar panel (or PV panel) is built with the latest most efficient 5BB monocrystalline solar cell. It is laminated by tempered glass, which is durable and robust. This 18V solar panel is ideal for use in off grid applications such as solar powered LED lighting, solar traffic sign, small solar powered system etc.

Which solar panels are best for off-grid applications?

It is laminated by tempered glass, which is durable and robust. This 18V solar panel is ideal for use in off grid applications such as solar powered LED lighting, solar traffic sign, small solar powered system etc. Click here to watch the video of this type of custom solar panels.
