## 3 kW solar panel 220v home complete set

How many solar panels are in a 3KW Solar System?

Depending on which panels are used, a 3kW system will comprise of 11 to 12 solar panels which equates to roughly 20m<sup>2</sup> of roof space. How much does a 3kW solar system cost? Because every solar installation is different we cannot provide pricing before first assessing your individual needs and requirements.

How much power does a 3KW Solar System produce?

Our 3 kW solar systems feature DIY solar kits, which will produce at least 3kW (or 3,000 watts) of power. This translates to approximately 200 to 750 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose from a selection of 3kW solar kits with string inverters, microinverters and ground mount options.

How much space does a 3KW Solar System need?

A 3kW solar kit from GoGreenSolar requires about 184 square feet of space. Solar panels with string converters need to be grouped together and facing the same direction. You'll want to consider whether this option is the right choice for you or if you'd be best served by solar panels with microinverters.
