13 How can I change the width of a line in a table produced by `toprule` to a default of 0.25em? I know it would be something along the lines of `renewcommand{\toprule}{??}` but ...

Both `toprule` and `midrule` add some vertical space, so `rowcolor` cannot fill completely the apparent cell spaces, but you can use a `specialrule` to make ad hoc rules:

Learn how to properly say Good Morning in Chinese, including different dialects and cultural context. Tips for correct pronunciation and usage provided.

If I understand you correctly, you want to keep the `toprule`, `midrule` and `bottomrule` commands and also add vertical lines to your table. Please be aware that the ...

As you write in the title, the commands are `toprule`, `midrule` and `bottomrule`, not the `topline`, `midline` and `bottomline` that you're using in the table.

MORNING translate: 晨, 晨 . Learn more in the Cambridge English-Chinese traditional Dictionary.
