
Arc flash switchgear for sale in New-Zealand

How common are arc flashes in New Zealand?

According to Worksafe, New Zealand data, two to four arc flash incidents occur annually in the country. Although electrocution tops the list of electrical hazards in the workplace, arc flashes can reap heavy damages and even fatalities.

How can arc flash analysis help a facility in New Zealand?

Industries in New Zealand must understand the causes and safety measures to safeguard their facilities from these hidden threats. An Arc Flash analysis from Care Labs can help maintain safety, compliance, operational reliability, and efficiency in a system, by and large, today!

Can a switchgear cause an arc flash incident?

For example, during peak load conditions, an outdated switchgear can cause an arc flash incident to happen. Protective devices like relays, if not coordinated properly can result in cascading faults that escalate to arc flash incidents and costly disruptions in the system.

What arc flash mitigation solutions do you offer?

We offer a variety of arc flash mitigation solutions, such as switchgear, software, and circuit breakers, for both passive and active arc flash protection. Our systems comply with the National Fire Protection Association (NFPA) 70E: standard for electrical safety in the workplace. Need help?

Schneider Electric New Zealand. Arc flash accidents in electrical installations are rare but severe. Ensure electrical safety at your workplace with our ...

Active solutions reduce or eliminate equipment damage and improve operator safety. We utilise the latest technology to monitor, detect, and ultimately quench an arc fault before it unleashes the destructive energy ...

NHP Arclogix Arc Flash Monitoring NHP's Arclogix Arc Flash relay range optically detects electrical arcs in switchboards and quickly trips circuit breakers, limiting potential damage and ...

1.1 Introduction Several reasons are behind an arc appearance in medium voltage switchgear: corrosion of electrical contacts, wear and tear of components, lack of ...

Eaton provides arc-flash protection and advanced safety systems for low-voltage switchgear to safeguard your business and employees against unnecessary risk

Schneider Electric New Zealand. Arc flash accidents in electrical installations are rare but severe. Ensure electrical safety at your workplace with our arc fault protection solutions.

The AQ 100 series of medium-voltage arc flash devices is built to meet the growing demands in MV switchgear and controlgear applications.
