# Battery Energy Storage Project in Hamburg Germany

Is Germany a key market for battery storage in Europe?

The project has been in development since 2021, undertaken by Aquila Clean Energy EMEA in collaboration with a partner company, covering all phases from greenfield development to operation. Kilian Leykam, Director of Energy Storage Commercial at Aquila Clean Energy EMEA, comments: "We see Germany as a key market for battery storage in Europe."

What is green flexibility & Hansa battery doing in Germany?

Green Flexibility and Hansa Battery have signed a framework agreement for the acquisition of five large-scale battery energy storage projects across Germany, with a cumulative power output of around 500 MW.

Who owns 520 MW battery energy storage system in Waltrop?

Hamburg, June 25, 2025 Luxcara, a leading independent German asset manager for clean energy infrastructure projects, has acquired a 520 MW battery energy storage system (BESS) project in Waltrop, Germany. It will be constructed on an unused site that was formerly designed to develop a coal-fired power plant.

What is a 50 MW / 100 MWh battery storage system?

In Str&#252;bel, Schleswig-Holstein, a 50 MW / 100 MWh facility is being built, making it one of the largest and most advanced battery storage systems in Germany, set to play a significant role in the energy transition. The project is financed by investors from Aquila Capital Investmentgesellschaft.
