What is a battery inverter?

A battery inverter, also known as a DC to AC inverter, converts the direct current (DC) stored in a battery into alternating current (AC), which is the type of current typically used in homes, businesses and industry. Battery inverters are therefore essential for making use of stored solar power.

Which inverter is best for home backup power?

With its customizable battery and stability it is the best solution of home backup power. Max low voltage system works effectively by mutual integration of Max 6i and Max 5b models. Max 6i module of the inverter is able to properly utilize solar power (up to 6kW) and transfer power with a high DC/AC ratio (up to 190%).

Why do you need an inverter with a battery backup?

Today, we can experience multiple power failures, which can severely affect our everyday activities. A dependable inverter accompanied with battery backup is all that one needs to stay safe in case of power outages, as it allows all the essential appliances and lights to run uninterrupted.
