
Belarusian commercial and industrial energy storage exports

What is the energy sector in Belarus?

Belarus's energy sector is dominated by state-owned companies operating under supervision of the Ministry of Energy in electricity, gas and part of the heat sector, and under BelNefteKhim (Belarus State Concern for Oil and Chemistry) in the oil, refining and petrochemicals sector.

Why does Belarus need control over the energy sector?

The government believes that having control over the entire energy sector will guarantee a secure and stable energy supply. Because of its modest natural resources, Belarus relies on imports from Russia to meet most of its energy needs.

Which country produces the most crude oil in Belarus?

Russia is the main supplier of crude oil refined in Belarus, and in turn Belarus is Ukraine's primary supplier of oil products. Total energy consumption (measured by total primary energy supply) in Belarus was 27.0 Mtoe in 2018, comparable with consumption in Norway and Hungary.

What is the economic profile of Belarus?

Belarus has a diversified industrial profile. Despite a lack of natural resources and the economic crisis that followed dissolution of the Soviet Union, Belarus has achieved solid economic growth through manufacturing and exports, including machinery and equipment, mineral products, chemicals, metals and textiles.
