
Belize Solar Energy System Energy Saving Solution

Who is Belize Electricity Limited?

Belize Electricity Limited (BEL) is the primary distributor of electricity service in Belize, Central America. BEL pursues a mission to provide reliable electricity at the lowest sustainable cost, stimulate national development, and improve the quality of life in Belize. **ABOUT THE BELIZE PUBLIC UTILITIES COMMISSION**

Is a solar resource assessment underway in Belize?

The CPP team recognized that a detailed solar resource assessment is underway in Belize, with specific measurements being taken at identified and promising sites. To complement that detailed analysis, the CPP included development of a GIS-based web tool called SpatialEdge, created by consultants NepCol International.

Can storage reduce power loss in Belize?

While storage was not identified as an optimal choice for Belize, bringing on distributed generation and storage capacity can significantly reduce power loss and shorten grid downtime. Organizations such as NREL have begun to value resilience in nuanced ways that consider the willingness-to-pay of customers to avoid outages.

Should Belize complete a solar procurement process?

The CPP analysis shows that, at current resource and cost estimates, Belize should complete a procurement process that secures: at least 5 MW of solar in addition to the planned 15 MW, and two onshore wind projects in Ambergris Caye and Maskall (up to 18 MW). **01 CONTEXT 16**
