
Burkina Faso wind-solar hybrid power generation system

Is Burkina Faso suitable for solar PV and wind development?

The findings of this study indicate that a portion of Burkina Faso's land area is suitable for solar PV and wind development.

Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

How will Burkina Faso improve electricity trade with neighbouring countries?

Additionally, the results from this report are intended to inform the design and development of the country's regional projects as Burkina Faso is planning to enhance electricity trade with neighbouring countries through regional interconnectors with Benin, Niger, Nigeria and Togo.

What are the 7 criteria for solar PV and wind power projects?

The seven criteria considered (resource quality; transmission line network; road network; topography; protected areas; population density; and land use) are explained in detail in terms of their effect on the planning of solar PV and wind power projects. The second section of this report explains the data sources for each criterion.

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system.

Study Optimization of a Hybrid Solar-Wind System from an This work is a contribution to the study of hybrid systems for converting solar and wind energy into electricity in Burkina Faso. The ...

In this study, interest is focused on the complementarity of solar and wind energy, in order to assess the profitability of a hybrid renewable energy system that can be installed at ...

This work is a contribution to the study of hybrid systems for converting solar and wind energy into electricity in Burkina Faso. The approach consists of evaluating and ...

Dutch IPP, Gutami Holding BV, and its local development partner have officially signed a Public-Private Partnership (PPP) agreement with the Government of Burkina Faso ...

About IRENA The International Renewable Energy Agency (IRENA) serves as the principal platform for international co-operation, a centre of excellence, a repository of policy, ...

Dutch IPP, Gutami Holding BV, and its local development partner have officially signed a Public-Private Partnership (PPP) agreement with the Government of Burkina Faso and a

Power Purchase Agreement ...
