
Buy outdoor power in Spain

Why should you choose solar power in Spain?

This means that Spain has more potential to generate solar power and save on electricity bills. We also take into account the number of sunny days in your particular city, as this affects the reliability and consistency of solar power. Spain lies between 36° and 43° north latitude. This affects the efficiency of solar panels.

Where can I install solar panels in Spain?

For 8 years, we have been providing solar panels and kits and their installation throughout Spain, including Madrid, Barcelona, Valencia and other provinces. We take care of all the paperwork and approvals required for solar installations. Contact us today for a free calculation or project for your solar system.

Are you happy with the solar hot water system in Spain?

All homeowners in Spain can now generate as much energy as they like, and receive credit towards their bill for what they don't use! Many thanks for the installation of our solar hot water system. We are very happy with the system, the people who fitted it were very good, removing the old system and quickly putting in the new system.

How much do solar panels cost in Spain?

The average price for installing panels in private homes in Spain varies from 2000 to 10 000 euros, depending on the type, power, manufacturer, seller and other factors. The performance of solar cells depends on the type of silicon they are made of. Monocrystalline panels have the highest efficiency (18-23%), but also the highest price.
