## Canberra Off-Grid Solar Container 20kW

Do you need an off-grid solar system in Canberra?

One of the biggest advantages of having an off-grid solar system in Canberra, ACT is reduced energy costs, as rural consumers are often asked by utility providers to pay excessive grid connection fees. If your building can't connect to the local power grid, an off-grid system is exactly what you need.

How much does a 20kW Solar System cost in Australia?

The price of a 20kW solar system depends on the choice of solar panels, inverters, balance of system used, and your property infrastructure, complexity of install and whether you opt for battery storage. On average, in Australia, the cost of a 20kW solar system whether for residential or commercial can be anywhere from \$15,000 to \$19,000.

What is a 20kW Solar System?

A 20kW solar system is a large and future-proof solar system capable of meeting the electricity needs of larger residential properties or small to medium-sized commercial businesses. A 20kW solar system is ideal for properties with significant energy demands and plenty of roof space.

Can a 20kW Solar System power a small business?

A 20kW solar system can comfortably power most Australian Homes and Small Businesses. There is likely to be excess power generated by a 20kW solar system if your home or business doesn't consume it. This power is typically exported back to the grid.
