
Compact power station factory in Germany

What is a transformer compact station?

Compact stations are space-saving, pre-configured stations that safely house transformers and other electrical components in a compact housing. These transformer compact stations are an efficient solution for power distribution as they are easy to transport and install.

What is a compact power station?

Compact stations are not only suitable for traditional applications, but also for use as intelligent grid stations in modern energy systems. By integrating monitoring and control technologies, they enable active grid monitoring and control, which helps to optimise the energy flow and stabilise the power grid.
