
Construction of energy storage project in Milan Italy

Why is CIP launching large-scale battery projects in Italy?

The development of large-scale battery projects aligns with CIP's growing focus on energy storage. With Italy's supportive regulatory environment, the partnership aims to leverage CIP's expertise to advance its storage infrastructure projects. The move also supports Italy's aim to meet the nation's 2030 renewable energy targets.

Can Italy make battery storage projects commercially attractive?

"Italy has a clear need for storage, and the enabling market and regulatory mechanisms are being put in place to make battery storage projects commercially attractive." CIP's Flagship Fund CI V, completed in March 2025, exceeded its EUR12bn (\$12.9bn) target.

Which projects have been submitted to the Italian Ministry of energy?

The 111MW project in Lombardia and the 97MW project in Puglia have been submitted to the Italian Ministry of Energy for approval. The 187MW project in Piemonte will be submitted for approval later this year.

How much energy does Italy need?

The 187MW project in Piemonte will be submitted for approval later this year. Terna (the Italian TSO) estimates in the last Adequacy Report for the Italian Electricity System that Italy will need around 27GW of energy storage capacity by 2033 to add a planned 120 GW+ of renewable generation to the Italian grid.

CIP and GC Storage Services to develop 2.3GW BESS pipeline in Italy The development of large-scale battery projects aligns with CIP's growing focus on energy storage.

The collaboration between CIP and GCSS will focus on deploying standalone battery projects in both Northern and Southern Italy, with the first project set to begin ...

Copenhagen Infrastructure Partners enters partnership with GC Storage Services for 2.3GW pipeline of large-scale battery storage projects in Italy The partnership will jointly ...

Italy is one of Europe's fastest growing energy storage markets and recently introduced mechanisms to support this nascent sector. To meet its decarbonisation goals, it set out the ...

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired ...

Project: Residential Energy Storage Deployment Capacity: 15 kW / 60 kWh (Three 5 kW / 20 kWh Wall-mounted Units) Application: Multi-Unit Residential Energy Optimization ...

The collaboration between CIP and GCSS will focus on deploying standalone battery projects in both Northern and Southern Italy, with the first project set to begin construction in 2025. CIP's increasing ...
