
Construction site secondary mobile power box

Can ETEC Powerbox be used on construction sites?

Optionally, the ETEC Powerbox can be equipped with an integrated DC fast charger with a charging capacity of up to 200 kW charging power allowing electric machines to be recharged at lightning speed. The ETEC Powerbox excels in versatility, reliability, and sustainability. It offers much more than just power on construction sites.

Can a pre-wired distribution box be used on construction?

The pre-wired versions can be used on construction... CEG series distribution box with power outlets is specifically designed to enable energy-dispatching routines within a variety of floor and building specifications. It is infused with isolating plastic ...

What is a PowerBox and how does it work?

With its optional integrated DC fast charger of up to 200 kW, the Powerbox enables ultra-fast charging. This makes it fully prepared for the energy demands of tomorrow: powerful, future-proof, and completely emission-free. The Powerbox can also be combined with a generator, creating a hybrid energy configuration.

What are the advantages of a powerbox?

Another unique advantage: the Powerbox can serve as an energy buffer. This means that even with a small grid connection, you can charge high power levels, eliminating the need for large grid connections. As a result, fully electric equipment can be deployed even in remote or grid-constrained locations.

TYVA Energie offers portable power station for construction as a mobile and versatile energy source. The Moduloo Ex battery range provides artisans and building professionals the ability to use electric tools and charge ...

The ETEC Powerbox offers emission-free construction site solutions, grid buffer, clean power for events, and mobile charging station.

Meet your sustainability goals with emission-free construction power solutions. Learn more about temporary power for construction sites.
