
Danish solar container outdoor power BESS

Is Eurowind launching a battery energy storage system in Denmark?

Eurowind Energy has announced the development of one of Denmark's largest Battery Energy Storage Systems (BESS), in collaboration with BOS Power. The project will be integrated at Eurowind's 84.8MW GreenLab Skive hybrid solar and wind facility, marking a significant step in the country's renewable energy landscape.

Who will build Energinet battery plant in Denmark?

BOS Power will serve as the system integrator for the project, delivering a 45MWh, two-hour battery system. Eurowind Energy will oversee the construction of the plant. The facility is expected to be operational by the end of 2025, providing essential ancillary and frequency control services to Denmark's transmission system operator, Energinet.

Where will the Bess be installed?

Eurowind Energy will develop and install the BESS at its GreenLab Skive 84.8 MW hybrid solar and wind plant. The GreenLab Skive solar and wind hybrid park generates 186,000,000 kWh annually.

What is Bess technology & why is it important?

"BESS technology is a vital part of our energy parks, ensuring a stable and efficient power supply and grid stability by ancillary services for the benefit of both the local energy supply and the green transition in general," says Morten Gaarde, Global EPC Director at Eurowind Energy A/S.

IPP Eurowind Energy will install a 45MWh BESS at a wind and solar plant in Skive, Denmark, one of the country's largest.
