# Development of battery cabinets in Western Europe

How can European policymakers help the battery storage sector?

Recommendations: How can European policymakers help the battery storage sector? Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price

Is the European battery storage market ready for 2029?

Despite positive market developments, SolarPower Europe stresses that the European battery storage market needs to grow at an even faster rate to meet the rising demand for grid flexibility. A potential total volume of up to 400 GWh is projected for 2029 - an ambitious but necessary target for the energy transition.

How many battery energy storage systems did Europe install in 2024?

In 2024, Europe installed 21.9 GWh of battery energy storage systems (BESS), marking the eleventh year of record-breaking annual additions since 2013, when our records began. The latest additions take the total running European battery fleet to 61.1 GWh at the end of 2024.

Which country has the largest battery storage market in Europe?

Germany, Italy and the United Kingdom continue to lead the European battery storage market in 2025 and together account for almost 70 percent of newly installed annual capacity. Germany holds the largest market share with 27 percent, followed by Italy with 17 percent and the UK with 11 percent.

An important development in EU battery policy was the establishment of the European Battery Alliance (EBA) in 2017 - an industry-led cooperation platform tasked with ...

Wood Mackenzie's latest research reveals Europe's battery energy storage system (BESS) deployment will grow 45% year-over-year to 16 GW in 2025, with a 9% CAGR ...

During this session, the industry association SolarPower Europe presented an exclusive preview of the new European Market Outlook for Battery Storage 2025-2029, published as part of The smarter E ...

European battery storage installations set a new record in 2024 with 21.9 GWh added, bringing total capacity to 61.1 GWh despite a slowdown in growth to 15 percent after three consecutive years of ...

Europe's battery energy storage system (BESS) market is expected to grow 45% year-over-year in 2025, expanding to 16 GW from a total of 11 GW as of 2024, according to an ...

European battery storage installations set a new record in 2024 with 21.9 GWh added, bringing total capacity to 61.1 GWh despite a slowdown in growth to 15 percent after ...

---

Welcome to our European Market Outlook for Battery Storage 2025-2029 Though the battery energy storage revolution continued to unfold across Europe in 2024, setting yet ...
