# Djibouti Wind Power Energy Storage Project

Who is developing a wind farm in Djibouti?

The wind farm project is being developed by the Africa Finance Corporation, FMO (the Dutch Development Bank), Climate Fund Managers and Great Horn Investment Holdings through Red Sea Power, a company incorporated in Djibouti to develop, construct, own and operate the project.

Why did Djibouti open up electricity production to independent operators?

For the government, the aim was to open up electricity production to independent operators so as to achieve energy independence as soon as possible. It should be noted that the state-owned company *Electricité de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP).

Will Djibouti achieve 100% electricity by 2030?

The first wind farm project in Djibouti, representing a significant milestone for the country on its path towards achieving its goal of 100% electricity from renewable sources by 2030.

How will the Ghoubet wind farm impact Djibouti?

In ecological terms, the Ghoubet wind farm will enable Djibouti to reduce its CO<sub>2</sub> emissions by around 250,000 tonnes a year. At the same time, it will enable the country to reduce its energy dependence on Ethiopia, from which it currently imports around 50% of its electricity consumption via a high-voltage line.
