
EU solar container lithium battery energy storage

What is the battery storage Europe platform?

SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery storage across the European Union. As a dedicated advocacy organisation for battery storage technology, the Platform will represent the interests of the sector at the EU level.

Should battery storage be optional in Europe?

The move builds on the success of SolarPower Europe's annual European Market Outlook for Battery Storage, an established point of reference in the energy sector. Juhi Dion Sud, newly appointed Head of the Battery Storage Europe Platform, said: "Battery storage is no longer optional- it is essential.

Is the European battery storage market ready for 2029?

Despite positive market developments, SolarPower Europe stresses that the European battery storage market needs to grow at an even faster rate to meet the rising demand for grid flexibility. A potential total volume of up to 400GWh is projected for 2029- an ambitious but necessary target for the energy transition.

How much battery storage capacity will Europe have in 2023?

According to the latest analysis from SolarPower Europe, Europe added 17.2GWh of new battery energy storage capacity in 2023, a 94% increase over the previous year, marking the third consecutive year of the market roughly doubling. This brought the total installed battery storage fleet to around 36GWh by the end of the year.

Revenue stacking models - where batteries participate in energy arbitrage, grid balancing, and capacity mechanisms - are already demonstrating viable business models in ...

A report from Solar Power Europe urges policymakers to prioritize battery storage through an EU Energy Storage Action Plan to ensure grid flexibility, especially after the Iberian Peninsula blackout.

The European Market Outlook for Battery Storage 2025-2029 analyses the state of battery energy storage systems (BESS) across Europe, based on data up to 2024 and ...
