
Efficient Collaboration between Schools and Folding Containers

What factors influence the construction of school-to-school collaboration?

Parents and the post-compulsory education admission policy are considered to be two factors that also influence the construction of school collaboration. Parental preference for high-performing schools and their bias against low-performing schools cause difficulties in building school-to-school collaboration.

Are different school structures a barrier to school collaboration?

Analysis indicates that the different school structures became barriers for both schools to share a consistent educational concept of school collaboration. Most of the school collaboration in this school district is limited to collaboration among junior high schools.

What is school-to-school collaboration?

As mainstream practice in urban areas, local governments normally initiated school district management and school-to-school collaboration to redress the difference between schools in the same area and expand service scale of quality education resources to local residents.

How can school collaboration improve educational quality?

Moreover, it enhanced understanding and exchange between school leaders and teachers. Nevertheless, it is necessary to make additional efforts to promote a system-wide reform that can meet diverse needs for constructing such school collaboration to raise educational quality.
