# Energy storage container production line manufacturing plant

What is China's new energy storage plant?

Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage. These lithium-ion battery units are designed for large-scale commercial and utility projects, helping stabilize power grids and support renewable energy integration.

How many Megapack units are produced at Tesla's Lin-gang plant?

Up to 10,000 Megapack units are scheduled to be produced here annually. As Tesla's first energy storage gigafactory outside the United States, the new Lin-gang plant only took nine months from groundbreaking, which took place in May 2024, to official operation.

What is Tesla's new energy storage plant in China?

The facility, first announced in April 2023, marks Tesla's continued expansion in China, the world's largest electric vehicle and energy storage market. Located in Shanghai's Lingang Free Trade Zone, the plant aims to bolster global energy storage capacity by producing 10,000 Megapacks annually, equivalent to 40 GWh of energy storage.

How much does Tesla's Energy Storage project cost?

Covering about 200,000 square meters, the new energy storage project attracts a total investment of 1.45 billion yuan (\$200 million). Up to 10,000 Megapack units are scheduled to be produced here annually. This photo shows a commercial energy-storage system at US carmaker Tesla's gigafactory in Shanghai, Feb 11, 2025.
