## Exported solar modules

How many solar modules did China Export in 2024?

(Photo Credit: TaiyangNews) Between January and September 2024 this year, Chinese solar PV manufacturers together shipped 186.77 GW of solar modules, representing a year-on-year (YoY) increase of 18% compared to 157.65 GW exported during 9M 2023, according to InfoLink Consulting.

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93 GW of PV modules, an increase of 13% compared to 207.99 GW in the same period in 2023.
