# Financing for Senegal Folding Container DC Project

Will DP World invest in Senegal's port of Ndayane?

DP World's \$1.2 billion investment in Senegal's Port of Ndayane represents a significant milestone in West African maritime infrastructure development. With its potential to boost economic growth, create jobs, and reshape regional trade dynamics, the project could be a game-changer for Senegal and the broader West African region.

Why should Senegal build a new port of Dakar?

It addresses the capacity constraints of the existing Port of Dakar, which has grown from handling 300,000 TEUs in 2008 to 800,000 TEUs in 2023 but is limited by its urban location. The new port is expected to support Senegal's long-term trade and economic growth ambitions by providing a more expansive and modern facility.

Why did Senegal invest \$1.2 billion in Ndayane?

The \$1.2 billion investment in Senegal's Port of Ndayane comes at a critical time for West African maritime trade. The region is currently facing significant challenges, including port congestion, infrastructure limitations, and rising maritime transport costs.

Why is Senegal launching a new port?

The new port is expected to support Senegal's long-term trade and economic growth ambitions by providing a more expansive and modern facility. Its location at the extreme western point of Africa makes it a natural port of call for shipping companies, positioned at the crossroads of major sea-lanes linking Europe to South America.
