
Full Solar System

What is a solar system?

The solar system is our cosmic neighborhood, a sprawling and dynamic family of celestial bodies orbiting a single, blazing star: the Sun. It's a place of fire and ice, storms and stillness, desolation and beauty.

What is included in the Solar System?

The solar system includes the Sun and everything that orbits it: planets, dwarf planets, moons, rings, asteroids, comets, and particles of dust. The solar system model is being updated by spacecraft like New Horizons. A second naked-eye comet for October? The solar system is located in one of the spiral arms of the Milky Way galaxy.

What is a small body in the Solar System?

Any natural solar system object other than the Sun, a planet, a dwarf planet, or a moon is called a small body; these include asteroids, meteoroids, and comets. Most of the more than one million asteroids, or minor planets, orbit between Mars and Jupiter in a nearly flat ring called the asteroid belt.

Where is the Solar System located?

The solar system is located in the Milky Way's Orion star cluster. Only 15% of stars in the galaxy host planetary systems, and one of those stars is our own sun. Revolving around the sun are eight planets. The planets are divided into two categories based on their composition, terrestrial and Jovian.

The solar system model is being updated by spacecraft like New Horizons. ¶ NASA A second naked-eye comet for October? Your October 2025 Moon guide Skywatching tips for October ...

NASA's Solar System Interactive (also known as the Orrery) is a live look at the solar system, its planets, moons, comets, and asteroids, as well as the real-time locations of dozens of NASA missions.

NASA's Solar System Interactive (also known as the Orrery) is a live look at the solar system, its planets, moons, comets, and asteroids, as well as the real-time locations of ...

Online 3D simulation of the Solar System and night sky in real time - the Sun, planets, dwarf planets, comets, stars and constellations

The Solar System is the gravitationally bound system of the Sun and all celestial bodies that orbit it. This includes planets, moons, asteroids, comets, dwarf planets, and ...

The Solar System The Solar System, in which Earth is located, is part of the Milky Way. In the Solar System, eight planets orbit the Sun in elliptical orbits. In addition to the planets, the Solar System consists of dwarf planets, ...

The Solar System The Solar System, in which Earth is located, is part of the Milky Way. In the Solar System, eight planets orbit the Sun in elliptical orbits. In addition to the planets, the Solar ...
