Functions

What is a function? functions is defined as a set of rules that associates input values with output values. Find out everything you need to know about functions

Function, in mathematics, an expression, rule, or law that defines a relationship between one variable (the independent variable) and another variable (the dependent ...

Free functions GCSE maths revision guide, including step by step examples, exam questions and free worksheet.

Explore algebraic functions with interactive lessons and exercises on Khan Academy, enhancing your understanding of mathematical concepts and problem-solving skills.

Inverse functions make it possible to convert from one file format to another. In this chapter, we will learn about these concepts and discover how mathematics can be used in such applications.

In this section we will cover function notation/evaluation, determining the domain and range of a function and function composition.

3.1 What Are Functions? Functions are what we use to describe things we want to talk about mathematically. I find, though, that I get a bit tongue tied when I try to define them. The ...
