# Georgia New Energy solar Panel Manufacturer

Will a new solar glass plant in North Georgia create a strong supply chain?

"SOLARCYCLE's announcement of hundreds of jobs coming to a new, cutting-edge solar glass plant in North Georgia further cements the Peach State as a national leader in domestic solar manufacturing, and they will play a pivotal role in creating a robust supply chain for the United States emerging solar footprint.

Does qcells have a solar plant in Georgia?

Qcells opened its first factory in Georgia in 2019 and hired 750 people to manufacture 1.7 GW of solar. This initial investment was made possible in part by the Section 201 tariffs imposed on solar cells. Last year, Qcells announced a second expansion, which would add 1.4 GW to its manufacturing output and hire 535 more people.

What's going on with Georgia's solar industry?

Politics envelops the solar industry. Vice President Kamala Harris visited the plant earlier this year. At the state level, Republican Gov. Brian Kemp has wrestled with Democratic U.S. Sen. Jon Ossoff over political credit for electric vehicle and renewable energy investments flowing to Georgia.

Will South Korea's new solar panel factory dampen efforts to make more solar?

It's part of the largest clean energy manufacturing investment in American history.

DALTON, Ga. - A South Korean company has begun production at a huge new solar panel factory in Georgia even as industry leaders say surging Asian imports could dampen efforts to make more solar components in the United States.
