# Hanoi Power Storage System Production

Can battery energy storage systems stabilize Vietnam's grid?

Sunita Dubey and Hyunjung Lee share how Vietnam is leveraging Battery Energy Storage Systems to stabilize their grid and accelerate the energy transition.

Where are battery storage systems made?

In May 2025, the company commenced production at a new manufacturing facility in Goodyear, Arizona, advancing its strategy to build a US domestic supply chain for grid-scale battery storage systems. The facility is equipped to produce steel enclosures and battery management system (BMS) hardware for its utility-scale energy storage products.

How is Vietnam advancing its energy infrastructure towards an energy-resilient future?

Vietnam is advancing its energy infrastructure towards a greener, more just, and energy-efficient future, simultaneously providing a valuable model inspiring the global drive towards an energy-resilient future.

Can BESS be integrated into Vietnam's power grid?

In an effort to facilitate the integration of BESS into Vietnam's power grid, the Electricity and Renewable Energy Authority (EREA) of the Ministry of Industry and Trade recently hosted a technical workshop in collaboration with GEAPP.

This project was delivered for a manufacturing enterprise in Vietnam and features a lithium iron phosphate (LiFePO<sub>4</sub>) battery energy storage system (ESS). The system enables ...

Fluence Energy opened a new automated battery storage manufacturing facility in Vietnam with partner ACE Engineering, with projected manufacturing capacity of 35 GWh/year.

Standardizing energy storage systems opens up opportunities to promote a circular economy and reduce electronic waste in Vietnam.

In May 2025, the company commenced production at a new manufacturing facility in Goodyear, Arizona, advancing its strategy to build a US domestic supply chain for grid-scale battery storage systems. The ...

Fluence Energy, Inc., a global leader in intelligent energy storage solutions, has partnered with ACE Engineering to inaugurate a state-of-the-art automated production facility ...

The organisations said it will significantly expand Fluence's production capacity for grid-scale energy storage systems amid growing global demand for battery storage solutions. ...

EVN's 50 MW Battery Energy Storage Systems (BESS) pilot project, in collaboration with ADB and GEAPP, aims for 300 MW by 2030. Vietnam is the fastest-growing energy market in Asia, according to the ...
