What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock)

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy

Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Vietnam's direct power purchase agreement (DPPA) framework is gaining momentum, with green energy projects increasingly taking shape under the model. VinEnergy, ...

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a ...

**Solar Storage Container Market Growth** The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated ...

**Background** Vietnam's FiT program has evolved significantly over the past decade. The country first introduced feed-in tariffs to stimulate investment in solar and wind energy, ...

**Clean, Reliable Power for Every Sector in Vietnam** Vietnam is accelerating toward a cleaner energy future. With rising electricity costs, grid unreliability in rural zones, and ...

**Note:** This analysis is based on market data and policies as of December 2025. Projections are subject to changes in government policies, technological breakthroughs, and ...
