## How to open the cover of the battery cabinet

with open ("test.txt") as f: lines = f.readlines () File &lt;stdin>&quot;...&quot;.doc&quot;  
openfile 70 ...

1)The shop is open. 2)The shop is opened. Is there a difference between &quot;is open&quot;  
and &quot;is opened&quot;? Or are they interchangeably? Thank you.:)
