# How to place the generator in the container

What is a containerized generator set?

( ) On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

How do you install a generator in a building?

To install a generator in a building in Project Zomboid, follow these steps: Find a generator, bring it to the building, fill it with gas, read the "How to use generators" magazine, right-click the generator and connect it, then turn it on. Do not place the generator inside the building as it will cause CO2 poisoning. Instead, place it just outside the walls of your build.

Do you need a container for a portable generator?

Whether you call it a box, shed, shelter, or enclosure, your generator needs to be protected and integrated into the environment around it. Here are some of the best reasons for building a container for your portable generator.

How do you build a generator enclosure?

Concrete: A slab of concrete (sometimes reinforced with steel rebar) is poured and cured before the generator is set atop it and the enclosure is built. Patio blocks: If you've got a level, cleared ground space, you can use patio blocks or pavers to provide a sturdy base.
