

Huawei charging pile energy storage business model

How many Huawei Supercharge charging piles will be installed in China?

(Yicai) Dec. 8 -- Huawei Technologies will join hands with its clients and business partners to install over 100,000 Huawei SuperCharge charging piles along major roads in China next year. The project will touch more than 340 Chinese cities, Hou Jinlong, president of Huawei Digital Power Technology, said during an industry forum yesterday.

What is Huawei Supercharge?

Founded in 2021, the unit of the Shenzhen-based telecoms giant focuses on clean energy generation, data centers, and electric mobility. Huawei launched the SuperCharge platform this year to enable a range of more than 200 kilometers after just five minutes of charging.

What makes Huawei a smart grid-forming energy storage solution?

Huawei's intelligent modular grid-forming energy storage solutions deliver three core values--ubiquitous grid-forming capabilities, end-to-end safety from chip to grid, and a unified platform catering to all business models--to expedite the development of a 100% renewable energy-based new power system."

How many Chinese automakers are compatible with Huawei digital power?

So far the platform has linked up with over 10 Chinese automakers to be compatible with more than 50 vehicle models. Huawei Digital Power partnered with GCL Energy Technology on building a network of liquid-cooled SuperCharge stations this year, per meeting minutes that the green energy provider released in October.
