
Industrial Energy Storage in Western Europe

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

How many energy storage facilities are there in Europe?

Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 GW. The predominant technology is mechanical storage (54.6 GW) with pumped storage hydropower plants. However, electrochemical storage, including lithium-ion and flow batteries, is catching up, at 11 GW.

Which energy storage technology is the most popular in Europe?

Pumped hydro is the most widely used technology for energy storage in Europe and worldwide, but batteries and hydrogen have come into the spotlight over the last decade as a recent trend in the energy storage market.

How many battery energy storage systems did Europe install in 2024?

In 2024, Europe installed 21.9 GW of battery energy storage systems (BESS), marking the eleventh year of record-breaking annual additions since 2013, when our records began. The latest additions take the total running European battery fleet to 61.1 GWh at the end of 2024.

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights Europe's rapid expansion in energy ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

<p>The Europe energy storage systems market report by Blackridge Research provides detailed insights into the deployment of advanced storage technologies across Europe. It examines key ...

European Energy Storage Inventory - projects under construction by technology Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 ...

European Energy Storage Inventory - projects under construction by technology Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 GW. The predominant ...

Germany continues to lead Europe's battery energy storage market, with 18 GW of utility-scale demand and 8 GW from commercial and industrial applications over the next decade.

Europe's battery energy storage system (BESS) market is expected to grow 45% year-over-year in 2025, expanding to 16 GW from a total of 11 GW as of 2024, according to an ...
