# Is there a large demand for energy storage in Tuvalu

Why does Tuvalu need a solar project?

This solar project echoed Tuvalu's action during COP15 and sent a symbolic message about the importance and necessity of global and concerted actions worldwide to promote renewable energy and mitigate climate change impacts to save threatened countries. However, the majority of Tuvalu's energy sources are imported fossil fuels.

What is Tuvalu's energy supply?

In 2021, fossil fuels accounted for 96 percent of Tuvalu's total energy supply, while solar and other renewable energy sources accounted for 4 percent. Tuvalu's economy is therefore highly vulnerable to fuel prices' volatility, which is why it is critical to find alternative sources of energy for the country's electricity supply.

Is Tuvalu a sustainable country?

With a total land area of just 16 square miles and a population of approximately 11,733, Tuvalu faces significant challenges in ensuring its sustainability and survival. In response to these threats, the country has emerged as a leader in promoting renewable energy, aiming for 100% of its electricity generation to come from renewable sources.

Does Tuvalu have a solar system?

The solar system accounted for 5 percent of peak electricity demand in Funafuti (Tuvalu's capital) and 3 percent of Tuvalu's annual household electricity consumption. It contributed to powering Tuvalu's households, healthcare facilities, small and medium enterprises, and other local development infrastructure.

The Asian Development Bank (ADB) has commissioned a 500 kW solar rooftop project in Tuvalu's capital, Funafuti, along with a 2 MWh battery energy storage system (BESS).

Tuvalu: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

What is the Tuvalu solar power project? The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is
