# Is there any subsidy for buying solar air conditioner

Can you get subsidies for air conditioners?

Consumers purchasing products with at least a grade 2 energy or water efficiency rating can receive subsidies covering 15 percent of the final sales price, with an additional 5 percent for items meeting grade 1 standards. Each customer may claim subsidies for one item per category, with air conditioners eligible for up to three items.

Can solar energy be used in air conditioning?

One such application of this renewable energy source is in air conditioning, through solar air conditioners. These heating and cooling appliances can work by using the sun as an energy source. Reduced energy bills and minimal environmental impact are just some of the benefits which this energy source provides.

Are solar air conditioners worth it?

Solar air conditioners usually cost more than traditional cooling systems. But the upfront expense is worth it to many because of the monthly energy savings. We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner.

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.
