Does Kyrgyzstan have a potential for EV deployment?

Whilst a transition to electric vehicles (EVs) is a key part of Kyrgyzstan's Nationally Determined Contribution to the Paris Agreement, the potential for successful EV deployment in the region is under-researched. To fill this research gap, this paper presents an assessment of the potential for EV deployment in Kyrgyzstan.

How can Kyrgyzstan achieve sustainable transport?

These include awareness creation, government procurement, financial incentives and capacity development. Recent policy changes offer hope for the deployment of EVs in Kyrgyzstan. Nevertheless, avoiding bottlenecks to a sustainable market development and a fast transition to sustainable transport would require additional research.

Can Kyrgyzstan transition to electric vehicles?

According to experts, Kyrgyzstan may face some problems requiring urgent solution when transitioning to electric vehicles. The streets of Bishkek. Photo: CABAR.asia In 2021, Kyrgyzstan, as part of the Paris Agreement, submitted an updated nationally determined contribution - NDC.

Does Kyrgyzstan have a battery recycling system?

"Besides, Kyrgyzstan does not have a proper battery recycling system. Watch battery recycling is environmentally unfriendly, and batteries are simply thrown away and go into the environment and cause much damage," said Vlad Ushakov.
