
Latest prices of heterojunction solar modules

How much does a low-cost photovoltaic module cost?

Low-Cost Photovoltaic Modules: Average price of EUR0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

Are solar module prices on a "consistent uptrend" in China?

Taiwanese research institute EnergyTrend has reported that solar module prices in China are on a "consistent uptrend." Its latest report said tunnel oxide passivated contact (TOPCon) module prices "rebounded sharply" and were widely quoted between CNY 0.70 (\$0.097)/W and CNY 0.75/W, reinforcing "bullish" market sentiment.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

How much did a module cost in October 2024?

An analysis by pvXchange reveals significant monthly and yearly price reductions across almost all categories in October 2024: High-Efficiency Modules: Average price of EUR0.14/Wp, down 6.7% from September 2024 and 39.1% from January 2024. Mainstream Modules: Average price of EUR0.11/Wp, stable compared to September but 21.4% lower than January 2024.

Updated photovoltaic module prices 2025: in August, high-efficiency solar panels fell to an average of EUR0.12/Wp in Europe.

Taiwan-based research firm EnergyTrend says market optimism in China has driven up solar module prices, while production of modules, cells, and wafers has increased month on month.

The Heterojunction Solar Module market size, estimations, and forecasts are provided in terms of output/shipments (GWh) and revenue (\$ millions), considering 2024 as the base year, with ...

Heterojunction (HJT) module prices in the US decreased by 2.9% between November 2024 and February 2025, according to a report from solar and storage software ...

The heterojunction (HJT) solar module market is experiencing robust growth, driven by its superior efficiency compared to traditional silicon-based modules. This technology ...

According to our latest research, the global heterojunction solar module market size reached USD 4.18 billion in 2024, reflecting robust expansion driven by surging demand for high-efficiency ...

What is the current market size of Global Heterojunction Modules Market? -> Heterojunction Modules Market size was valued at US\$ 2.34 billion in 2024 and is projected to reach US\$...
