# Malawi Hydropower Energy Storage Project

Will the World Bank support the Mpatamanga hydropower storage project?

The World Bank has approved a \$350 million grant to support the development of the Mpatamanga Hydropower Storage Project in Malawi. The funding, provided through the International Development Association (IDA), will help advance the country's largest energy infrastructure project to date.

What is Malawi's hydropower project?

Once completed, the hydropower plant is expected to provide electricity to over one million households and support thousands of jobs. Malawi's Minister of Energy, Ibrahim Matola, said the project is the country's most cost-effective option for addressing growing energy demands and expanding electricity access.

Are hydropower projects feasible in Malawi?

Hydropower projects in Malawi are feasible from a water resources standpoint. According to the master plan level study of WB1998, cascaded development is more beneficial than single development.

Who is responsible for hydropower development in Malawi?

The Ministry of Natural Resources, Energy and Environment (MoNREE) is responsible for hydropower development in Malawi. The MoAIWD is the central institution to facilitate the development and management of water resources in Malawi.
