## Mobile energy storage container charging information

What is a mobile energy storage system?

Mobile energy storage systems (MESSs) can be self-mobile electric vehicles(vans,buses,or light-duty vehicles) or towable (semi-trailer trucks). During restoration purposes,MESS should be dispatched to the desired location (non-black start generator unis locations).

What are the different types of energy storage options?

Scalable, Modular Energy Storage: Configurations range from 150kWh to 450kWh, with daisy-chaining options for extended capacity. Energy Storage Only - Providing flexible, off-grid power solutions. CCS DC Fast Charging - Featuring dual 150kW CCS chargers, suitable for high-speed public and commercial EV charging.
