
Montenegro Power Supply Bureau solar container system Sales

Is Montenegro launching its first battery energy storage tender?

Montenegro's Elektroprivreda Crne Gore (EPCG) has upped the ante for its first battery energy storage tender. In a pioneering move for state-owned utilities in the Balkans, Montenegro's largest power utility, EPCG, is planning to launch a large-scale, battery energy storage procurement exercise by the end of 2024.

How much does a solar project cost in Montenegro?

The maximum price to compete for is EUR 65 per MWh and the contracts will last 12 years.

The Government of Montenegro adopted the decisions and directives necessary for issuing a public call to auction for solar power projects of at least 400 kW. The lowest bids will win, and the maximum price is EUR 65 per MWh.

How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perucica (307 MW) and Piva (363 MW).

Will Kapino Polje install a 5 MW battery energy storage system?

The utility has also decided to install a 5 MWh battery energy storage system alongside its proposed Kapino Polje solar power plant, which would have 5 MW of installed capacity.

Montenegro has unveiled plans for the country's maiden solar energy auction, allocating a quota of 250 MW. It will entertain solar power plants with a minimum capacity of ...

The participants in the forthcoming auction for solar power projects in Montenegro will bid for state support for a total of 250 MW.

EPCG, Montenegro's state utility, aims to procure two grid-scale battery storage systems (BESS) totaling 240 MWh in a EUR48 million (\$55.9 million) tender.

In a pioneering move for state-owned utilities in the Balkans, Montenegro's largest power utility, EPCG, is planning to launch a large-scale, battery energy storage procurement ...

Montenegro has taken a decisive step toward modernizing its power system with a EUR48 million investment in large-scale battery energy storage systems (BESS). State-owned ...

The project envisions deploying battery storage systems across multiple locations, including a 60 MWh system at HPP Perucica, two 60 MWh systems at EPCG's Niksic steel ...

The new systems are intended to strengthen the resilience of Montenegro's power grid, providing additional flexibility to manage fluctuations in electricity production and ...
