
New solar container outdoor power in London

Will the London Underground be powered by solar energy?

Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's transport network and support biodiversity. A new solar facility will be built in Longfield, Essex, by EDF Renewables UK through its subsidiary Longfield Solar Energy Farm Limited.

Will a new solar farm be built in Longfield?

EDF Renewables UK to begin construction work on a new solar farm in Longfield, Essex, from next year, providing green energy to the Tube, as well as decarbonising the National Grid and increasing its capacity.

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

What will a new solar facility do for the tube?

The contract will see a new solar facility built in Longfield, Essex, and renewable energy generated for the Tube. The facility will also support the decarbonisation of the National Grid and increase its renewable energy capacity.
