
New solar module export site

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93 GW of PV modules, an increase of 13% compared to 207.99 GW in the same period in 2023. Comparison of Chinese PV module exports in 2023 and 2024. Source InfoLink

Which countries import PV modules from China?

In December, China exported approximately 16.63 GW of PV modules, a 9% increase compared with the 15.2 GW in November. The ranking of countries importing PV modules from China was Brazil, the Netherlands, India, Saudi Arabia and Spain. The total monthly imports of these major countries accounted for about 42% of the global market.

China's solar cell exports have surged to unprecedented levels, driven by a perfect storm of global decarbonization policies, manufacturing efficiency, and shifting trade patterns. ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

Solar module exports from China increased 13% year-on-year (YoY) in 2024 to 235.93 GW, with the inclusion of around 16.62 GW in December 2024 which was a month-on-month (MoM) growth of 9%. ...

The diversification of module export markets is pronounced, with markets outside the top ten accounting for over one-third of the total share, signaling the emergence of many ...

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

Solar module exports from China increased 13% year-on-year (YoY) in 2024 to 235.93 GW, with the inclusion of around 16.62 GW in December 2024 which was a month-on ...

In 2023, China achieved record photovoltaic export volume growth across all subcomponents, driving manufacturing expansion in emerging markets. Following Wood Mackenzie's recent presentation at ...
