## New solar panels in Jerusalem

Can solar panels be installed on 100,000 roofs in Israel?

As part of its project to install solar panels on 100,000 roofs in Israel, the Ministry of Energy and Infrastructure will initiate two new incentive tracks to be discussed by the Electricity Authority, for those interested in putting solar panels on their homes.

How much would solar panels cost Israel?

The Ministry of Energy and Infrastructure estimates that if there were solar panels on 100,000 homes, these tracks would result in a net cost of an additional NIS 51 million per year for the Israel Electricity Corp., but in the long term these extra costs should balance out, so the total compensation would not change.

Why do Israelis install solar panels on roofs?

This stems from the advantages that the Ministry of Energy sees in installing solar panels on roofs, including energy efficiency (sometimes there is no need to transfer the electricity to high voltage), decentralization of energy production, and meeting Israel's renewable energy goals.

How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan)

Energy Minister Eli Cohen told a press conference in Jerusalem that solar panels promised a return on investment of at least 15% annually over 25 years.
