# Philippines rooftop solar panels

What is Philippine Solar Rooftops?

Philippine Solar Rooftops is a company that provides solar panel installation and other services. They have been in business since 2013 and have served over a hundred clients. They are a one-stop shop for clients who look for clean energy solutions because of their commitment to being on top of trends and developments in the industry.

What are the different types of solar roofs in the Philippines?

There are three types you can choose: grid-tie, off-grid, and hybrid. Grid-tie solar systems are common for a solar roof in the Philippines. They interconnect with an existing grid and do not use batteries. This system allows you to use power from the grid at night -- or when you consume more electricity than the panels can produce.

Why should you install a solar roof in the Philippines?

In essence, proper installation of a solar roof means free power for you in the long term. At Solaric, we believe in making renewable energy accessible for every household and facility. That means providing our customers in the Philippines with a solar roof that suits their electricity needs. Our catalog has a solar panel system for everyone.

Could rooftop solar help the Philippines achieve a 37% share?

Rooftop solar could offer a valuable path to expand on national renewable energy capacity and could be a valuable tool in achieving the Philippines' renewed ambition of achieving over 37% share of renewables in the power mix by 2030.
