## **Photovoltaic container hybrid type used in Russian oil refineries**

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the ...

Nearly-zero energy buildings, is a requirement introduced by the Energy Performance of Buildings Directive EU/31/2010 (revised in 2018). It means that all new buildings - as of 2020 - must ...

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

Solar energy also creates jobs directly. The workforce of the photovoltaic sector grew by 27% to 826 000 by the end of 2023, up from 648 100 workers in 2022. This rapid growth means that

...

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.
