
Photovoltaic energy storage containers offer ultra-high efficiency and optimal cost-effectiveness

Nearly-zero energy buildings, is a requirement introduced by the Energy Performance of Buildings Directive EU/31/2010 (revised in 2018). It means that all new buildings - as of 2020 - must ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and ...

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.
