# Portable camping solar container outdoor power recommendation

Are portable solar panels good for camping?

Portable solar panels for camping are game-changers for outdoor lovers. No more dead batteries or noisy generators--just clean, quiet power wherever you go. Whether you're deep in the woods or parked at a remote site, these panels keep your gear running.

How many solar panels do you need for camping?

In general, 1 to 2 panels from the portable solar panels for camping category--ranging from 100W to 220W--should cover most campers' needs. To be safe, always overestimate a little, especially if you're charging multiple devices or using solar powered camping gear consistently.

How portable is a solar panel?

Those were rated Poor. How portable a solar panel is depends in large part on its physical size. 400W portable solar panels are a lot harder to lug around than 100W portable solar panels, and they won't fit as easily in your car or on a garage shelf.

Are portable solar panels smart?

Portable solar panels aren't all that smart. Whatever blast of sun they are getting will be transmitted directly as power to your power station. So before you purchase a portable solar panel, first look at your power station to see how much solar input it can handle. (This is typically found in very small font on the bottom of your power station).
