
Portable power source factory in Cambodia

What are the main sources of electricity in Cambodia?

Major sources of local power generation are hydro and coal, and minor sources include diesel, wood, and biomass. In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season.

What is Cambodia's photovoltaic factory?

Since its establishment, the Cambodia factory has focused on the current uneven local development of electricity, customizing small off-grid household photovoltaic systems for rural areas that lack electricity, providing electricity support and promoting the development of green power.

Why do Cambodians need diesel generators?

There is tremendous demand in Cambodia for diesel generators as backup power, on-site power plants, and power generation in rural areas not served by public utilities.

Can US companies use solar energy in Cambodia?

Opportunities exist for power generation and transmission equipment. The Cambodian government encourages usage of solar energy technologies, but U.S. companies are advised to review new regulations that might impact their business practices. Ministry of Mines and Energy
