Belarus broadcasts according to the DVB-T2 standard with MPEG-4 compression. Radio broadcast stations: 173 with 24 privately owned, including 30 FM stations.

What is a portable power station?

Portable power stations are compact, battery-powered devices designed to provide electricity wherever you are. They come equipped with various ports to connect different devices, including your TV. The primary purpose is to offer a reliable power source during emergencies or when you're far from a traditional outlet.

Can a portable power station run a TV?

A portable power station can run a TV efficiently, given its compatibility with the TV's power requirements. Ensure the power station's wattage matches or exceeds the TV's needs for uninterrupted viewing. Battery capacity and output ports also play a crucial role in determining how long and effectively the TV can operate.

How do I choose a power station for my TV?

A portable power station with at least 300-500 watts is ideal for most TVs. Check your TV's wattage and choose a power station that exceeds it. Consider additional usage needs if you plan to power other devices simultaneously. Ensure the power station is reliable and suitable for your specific TV model.
