# Prague solar power monitoring system

What is a Solarmon monitoring system?

The new monitoring system named Solarmon-2.0 is intended for collecting, diagnosing and processing data. The system communicates with the inverters, electrometers, metrological equipment and external components of the photovoltaic arrays. The whole system is developed and built on special data collecting technology.

Does solar monitor have a PLC?

Solar Monitor has upgraded its GSM units for generational data transfer acceleration through modern LTE and UMTS networks. The PLC is predestined for consumption management in relation to the power production. Possibility of PLC programming depending on particular situation enables that.

What is solar monitor doing in Kuwait?

For the Ministry of Education in Kuwait we have implemented a data visualization from a solar powerplant located at a school in Kuwait. Solar Monitor has upgraded its GSM units for generational data transfer acceleration through modern LTE and UMTS networks. The PLC is predestined for consumption management in relation to the power production.

What does a solar power company do?

We design, build and manage PV power and storage systems for rooftops and other property. We deliver comprehensive solutions covering the full lifecycle of solar power plants. We provide a full range of O&M solutions, including monitoring and inverter maintenance.

The new monitoring system has been used to follow 65 solar plants in the Czech Republic and elsewhere for 175 MWp. As an example, we have selected 13 PV plants in this ...

A solar weather station (also called a "PV-specific weather station") is a specialized monitoring system designed to track environmental conditions directly relevant to ...

Complete solar power and renewable energy solutions, including photovoltaic systems, energy offtake and DSR.

CAMPBELL, Calif. and PRAGUE, Czech Republic, July 8, 2025 -- Tigo Energy, Inc. (NASDAQ: TYGO) ("Tigo" or "Company"), a leading provider of intelligent solar and energy ...

Remote control of your domestic power plant for an advantageous price. Current production, outage notification and invoicing in your browser.

What is a Solar Inverter-Monitoring system? Solar Inverter-Monitoring system is an additional device attached to the inverters to check the performance of individual panels or ...

Solarmonitoring is progressive Czech company specializing in monitoring and diagnosing of photovoltaic power stations. We exist on the market since 2009, when we came up with ...
