# Price Comparison of 30kW Folding Containers for Wastewater Treatment Plants

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a HWT containerized sewage treatment plant?

An HWT containerized sewage treatment plant is a compact and mobile system designed to treat wastewater. It works by collecting sewage into a modular container, where various biological and mechanical processes break down and remove pollutants.

How much energy does a containerized wastewater treatment plant use?

No planning or buildings are required to operate a containerized wastewater treatment plant - the plant simply needs to be placed on a solid base. This saves costs in advance, and the system is also highly efficient during operation: a 20-foot container only needs 13 kWh/d. Container.One, Container.One+, Container.Pro and Container.Xtra.

How many m<sup>3</sup> of wastewater can a containerized wastewater treatment plant handle?

We have experience with containerized wastewater treatment plants for up to 1,380 PE or 207 m<sup>3</sup> of wastewater per day. A wastewater treatment plant is only as effective and efficient as the installed system.

One of the first questions potential customers ask is, "How much does a wastewater treatment plant cost?" While every plant is unique, we've analyzed actual costs vs gallons per day (GPD)
